### Magnetic (Magnet) Therapy

According to today's modern medical science, many diseases in the human body arise due to only two reasons,

First reason :  
Decrease in our blood circulation and

Second reason :  
Decreased oxygen level in the body

When the internal organs of our body do not get blood and oxygen according to their requirement, then the blood cells of our body start to weaken and our immunity decreases.

In today's time, we have almost stopped taking the basic requirement of our body, such as : pure water, pure air, use of diet and good habits, good sleep. Because of which our body has to face serious problems, and also germs, bacteria, viruses spread in the environment enter our body through food and drink. Because of this many types of diseases start arising in the body. To get rid of all these problems forever, Lifegain Medical India Company has created the best product for all of you. Lifegain Medical India Company has used electro magnetic components for the first time, which have a positive effect on our body.

॥ एक कदम लाईफगेन की ओर, एक कदम स्वस्थ भारत की ओर ॥

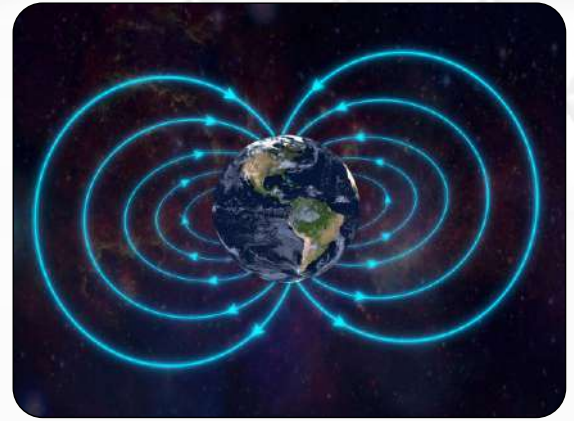

Of all the planets that have been discovered so far in the entire universe, life has been found only on Earth. And our earth itself is a magnet, and we also know the force of that magnet as the force of gravity, which includes both North pole and South pole.

About 5000 K.M. in the womb of the earth below is a hot sea of iron, which we also know as lava flow, which is continuously boiling at about 6000°C, and at the same time the earth is continuously revolving around the sun, whose speed It is approximately 107000 kilometers per hour. Because of this two forces -

1. Gravitational force and
2. Magnetic force is being generated.

Because of this everything is stable in its place. And because of this magnetic force, blood continues to flow inside our veins, as we all know, iron is also found in our blood, and this iron only works to deliver oxygen to the whole body. If there is less iron in our body, then due to that there will be lack of oxygen in the body, then our blood cells will become weak, due to which our age will start getting affected. If the blood cells are healthy then our body will also be healthy, but if the blood cells are weak then our body will also become weak and sick. Keeping all this in mind, Lifegain Medical India Company decided to make its new product "Lifeguard Plus EMS Mat", and showed all of us the way to live a disease free life.

#### What is magnetic therapy ?

Electro Magnetism System was first discovered by James Clerk Maxwell in 1873. He was the first to end the distance between Electricity and Magnetism, the substance that produces the magnetic field is called a magnet. The magnetic field is invisible. To attract nearby magnetic objects and to attract or repel other magnets.

One of the famous remedies of magnetic therapy is considered, and magnets are also used as a treatment for many diseases. The magnet also imparts its main quality i.e. the attractive element to the human body. Therefore, it has the power to destroy the negative components produced in the human body. And helps in curing diseases inside and outside the body. This therapy is based on the principle that our body is basically an electrical structure. And every body has some magnetic elements from birth till the end of life. Magnetic therapy has a positive effect on the human body through the blood circulation system. Electro magnetism Rays are found around us in many ways, some of which we use in our daily lifestyle,

Such as: - Radio, microwave, X-Rays etc. and some rays are not beneficial for us,  
Like: - Ultra Violet, Gamma etc.

### Advantages of magnetic therapy :

- \* This therapy is considered beneficial for people of all ages. Magnetic therapy improves blood circulation in the body. Keeping the magnet in contact with the body continuously for some time generates heat in the body, Due to which all the functions of the body are regular, and helps in increasing the blood circulation in the whole body.
- \* Magnets have properties to heal many types of physical pain. With the help of magnetic therapy, pain and swelling of any part of the body can be relieved, as well as it also helps in exhaustion and weakness of the body.
- \* Magnetic therapy shows quick results in cases like toothache and sprain.
- \* The body does not get used to the treatment of magnets and there is no negative effect on the body even if its use is stopped suddenly. Magnetic waves clean the harmful elements (cholesterol etc.) that accumulate inside the body and make the blood thinner and cleaner. This makes the heartbeat normal, and the blood pressure is regular, and the nervousness goes away.
- \* It also reduces inflammation, helps in developing and strong the cells of the magnet body, and also helps in giving new life to the muscles.
- \* It also helps in reducing some of the symptoms of osteoarthritis.
- \* It also helps to benefit arthritis, headache, and tension-related pain.
- \* Magnetic therapy helps to cure blood clots in the veins as soon as possible.

Using this therapy helps in increasing the immunity power of our body. Helps in reducing any type of inflammation in the body.

With this therapy, our blood circulation starts working properly.
